

Amstrad

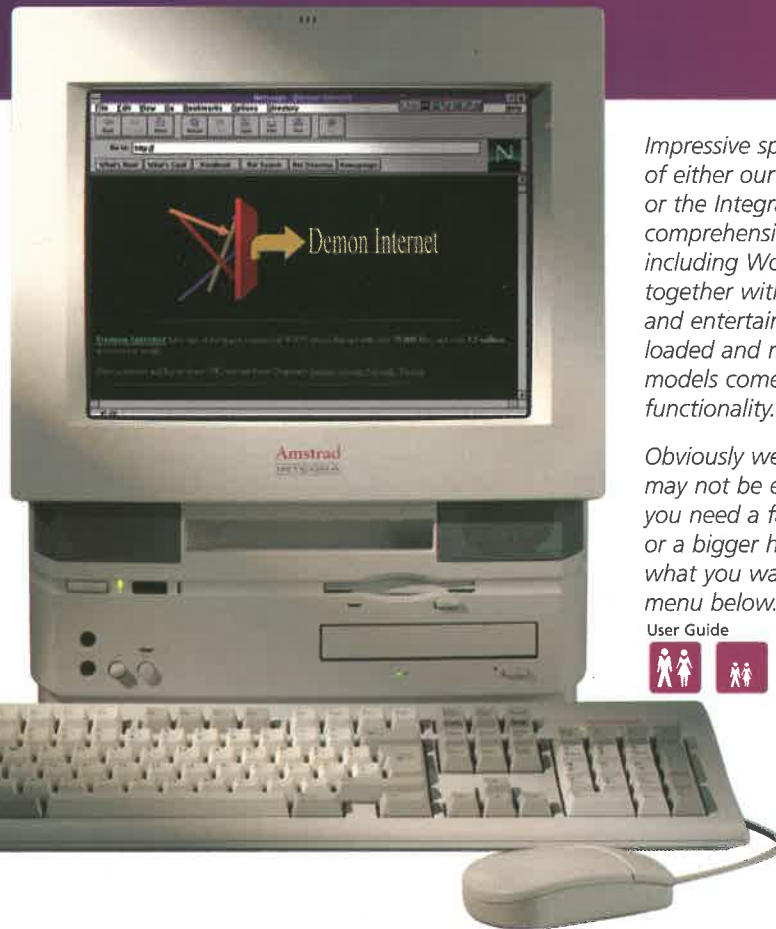

INTEGRA

*Everything you want in a PC,
now and for the future.*

Choosing the Integra that's right for you.

On these pages you'll find four ready-made Integra packages together with details of upgrade options. However, if you can't find the system that's exactly right for you, then we will tailor-make an Integra to your ideal specification. The Amstrad Integra comes with a TV Tuner/Teletext/Video Capture, remote control, Quad-Speed CD-ROM, 16-bit Stereo Sound with speakers, amplifier and internal microphone, and a Data/Fax/Answerphone/Speakerphone Modem as standard. What's more, the Integra offers you one month's trial to the Internet - absolutely free! As you would expect, the Integra is covered by The Amstrad Promise. Take a step into the future, call us for advice on buying an Integra system today on 0990 811811.

Impressive specifications and a choice of either our entry level Integra PC/TV or the Integra PC/TV Premier with its comprehensive software suite, including WordPerfect Works together with multimedia education and entertainment titles all pre-loaded and ready to go, plus both models come with full speakerphone functionality.

Obviously we understand that this may not be enough for some, so if you need a faster CPU, more memory or a bigger hard drive simply choose what you want from our upgrade menu below.

Integra PC/TV ~ the ultimate PC

Don't just take our word for it ...

Designed for

Microsoft
Windows 95

pentium
Pentium is a registered
trade mark of Intel
Corporation

...see what the experts say ...

"The Integra is everything a home PC should be, pre-configured and ready for most things a home user is likely to want, from domestic accounts to Internet access & games." **Personal Computer World, March 1996**

"Well integrated TV and PC functions. Easy to use remote control. Well designed comms and fax software." **PC Plus, March 1996**

"Amstrad has come up with a very good all-in-one system that will let you play multimedia titles, manage voice calls and faxes, and act as a second TV for your home." **What PC, February 1996**

The 'Best Buy' was awarded to the Integra in the January 1996 issue of Computer Shopper. All reviews were based on the Integra Power Pro P90 (was £1599 ex VAT, £1896.45 inc VAT & delivery - now upgraded to P100 £1299 ex VAT, £1543.95 inc VAT & delivery)

The INTEGRA from Amstrad, more than just a PC

The new Amstrad Integra PC/TV is set to revolutionise what you do in the future. Why? because it's an advanced future-proof multimedia PC as well as a full communications centre. The specification options include:

- A range of processors - 80MHz, 100MHz 486 DX2 or Intel Pentium® 75MHz up to 133MHz Processor
 - **8Mb RAM** (expandable to 128Mb)
 - **540Mb Hard Disk Drive** (upgrade to 1Gb)
 - **Quad Speed CD-ROM** ■ **256Kb Cache** (standard on Pentium models)
 - **1Mb Video RAM** (expandable to 2Mb)
 - **Creative Labs® 16-bit Sound Blaster 16 Stereo Speakers**
 - **14.4K bps internal fax/modem/answerphone/speakerphone**
 - **TV with Fastext & Remote Control** ■ **PCI Local Bus 32-bit or 64-bit Graphics** (Pentium only)
 - **PCI enhanced IDE 32-bit Hard Disk Interface**
 - **Photo CD Player** ■ **MPEG Option**
 - **30 Days FREE Demon Internet Trial**
 - **The model shown is supplied with MS Windows® 95 only.**
- All other models include 5 additional application software titles.

Advanced Multimedia PC

The Integra is available in many different configurations, with models ranging from 80 MHz 486DX2 right up to Intel's Powerful Pentium Processors™ running at 100MHz and beyond. As the Integra has been designed using "industry standard" components,

pentium
PROCESSOR

486
DX2/80

upgrading could not be easier. With its easy pull-out tray, you can add more memory, a faster CPU or extra expansion cards - just like a traditional desktop PC!

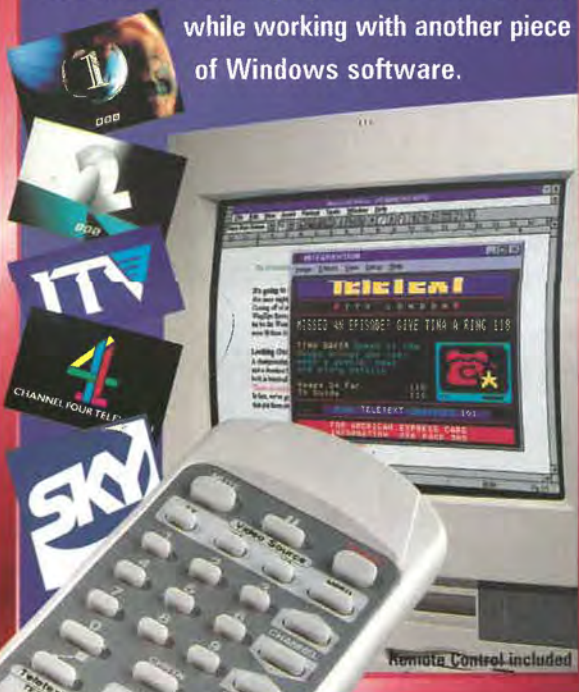

Amstrad INTEGRA

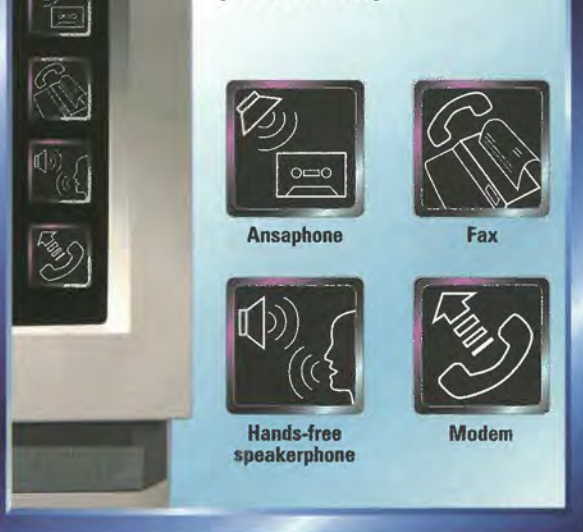

Digital Television

Not only a PC, but also a full function TV! Each Integra comes with TV & Teletext built in, so you can watch your favourite TV programmes and access useful teletext pages. Plus, to make things simple, a remote control is also included. TV & Teletext run directly under Windows '95, so you can size the picture on screen and even display both TV and Teletext while working with another piece of Windows software.

Communications Centre

Every Integra comes with a fitted fax/modem, so you can send and receive faxes & data to any other PC with a modem or swap faxes with any standard fax machine. The modem also acts as a digital answering machine that can differentiate between a voice and a fax. What's more, all models come with full duplex speakerphone function, so, as microphone and speakers are both built-in, you have a "hands free" phone facility.

The Worldwide Internet

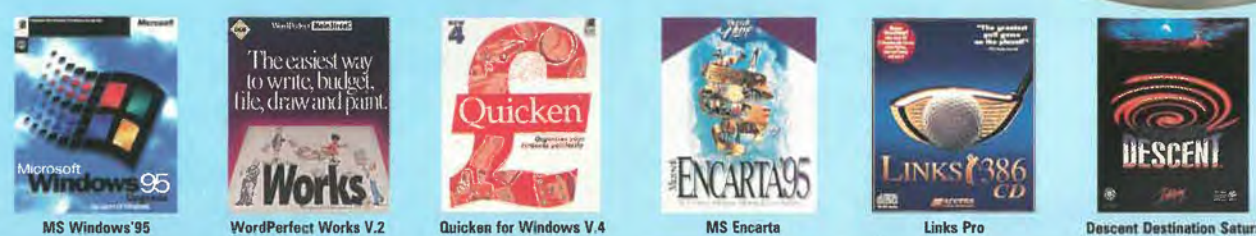

Multi Functional CD Player

With an inbuilt Sony™ quad speed CD-ROM drive, the Integra gives you unlimited access to the world of educational and entertainment CD-ROM.

Software pre-loaded ready for use

Video CD

Video CD, the video format of the future, is here now. With the Mpeg option fitted to your Integra, you can watch all the latest & classic remastered film releases with the ultra sharp digital sound & picture quality that you can only get from Video CD.

Kodak Photo CD

You can now get your holiday snaps scanned onto a Photo CD - the future of photography. As Kodak™ Photo CD Windows software is pre-installed on all Integras, you can display them as a slide show, edit them on-screen & print as many copies as you want. Pictures can also be saved/imported into other Windows applications and can even be "E-Mailed" to family and friends who have a PC with a modem.

Picture Freeze

This amazing facility lets you freeze and save any picture on the screen from live TV, Video CD, video recorder or even your camcorder - either to save & import into another Windows '95 application, edit, title, print or even send down the line to a friend.
